TRADE GUIDE

APHIS ACE CORE PGA Message Set

U.S. Department of Agriculture - Animal and Plant Health Inspection Service
Our Mission - *To protect the health and value of American agriculture and natural resources.*

Background

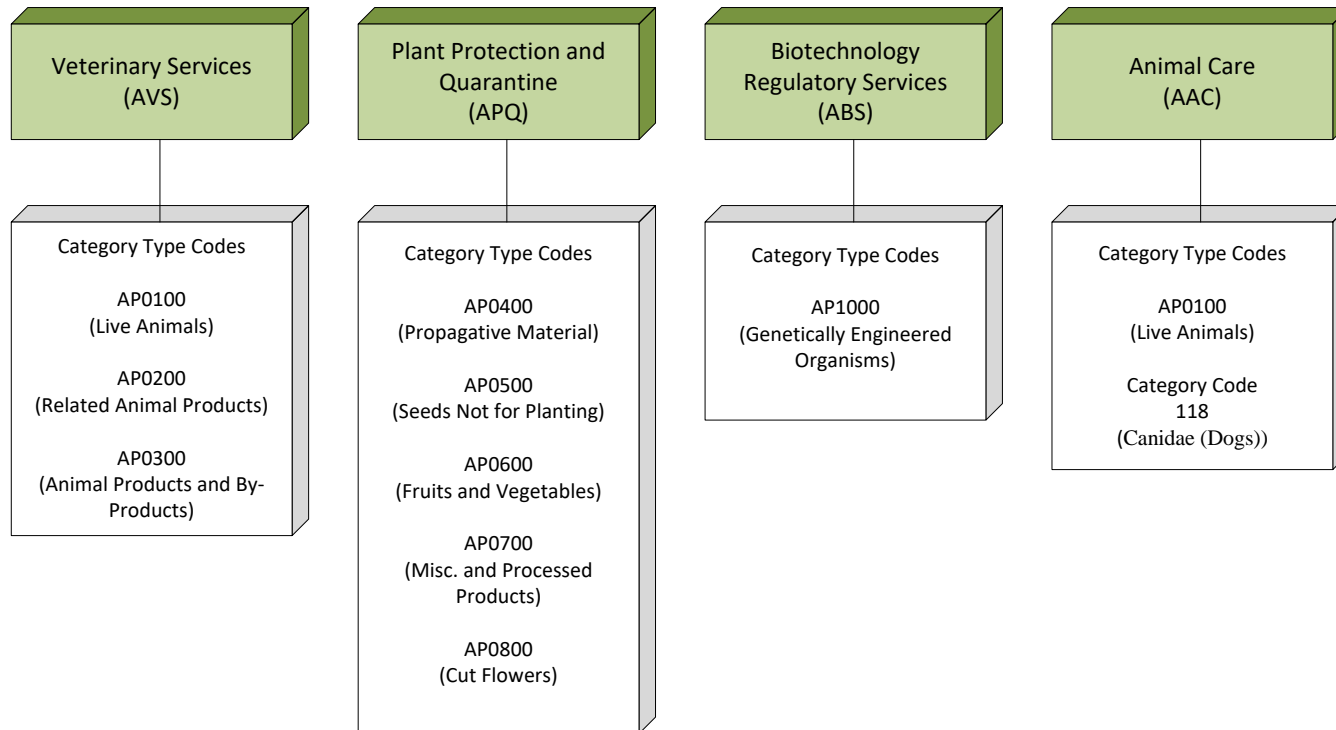

In 2006 Congress passed the Safe Port Act which required all federal agencies to utilize the Automated Commercial Environment (ACE), International Trade Data System (ITDS), “single window” environment to facilitate the import process. Furthermore, in February 2014 the president of the United States signed the 21st Century Trade Facilitation executive order which mandated that all partner government agencies (PGAs) implement the “single window” by December 2016. The objectives of single window concept are: 1) Rapid availability of data that allows the government to efficiently identify commodity risk and make near real-time regulatory decisions. 2) Reduction in paper and increased electronic communications between trade and regulatory agencies which facilitates the import process. 3) Helps industry to comply with government regulations 4) Increases business process efficiency and reduces costs to government and industry.

Appendix Overview

The Appendix APH-A: APHIS Supplemental Trade Guide is primarily designed for filers that report APHIS Message sets on behalf of Importers. The guide is essentially a “job aid” aimed at separating the operational data entry concepts from the technical aspects of the APHIS Message sets. APHIS developed the material during the “optional” reporting phase of the APHIS Message Set initiative due to positive feedback received regarding information communicated via the [APHIS] ACE.ITDS@aphis.usda.gov service account. Much of this information was generated as a result of questions or recommendations by trade to produce material explaining the APHIS Message Set in a less technical way. Recommendations from trade also encouraged APHIS to cross reference key pieces of the APHIS Message Set design. This included cross referencing Harmonized Tariff Schedule (HTS) code with record lines like PG01 (APHIS Programs) and PG10 (APHIS Commodity Category Types).

Programs

The APHIS Core Message Set includes Plant Protection & Quarantine (APQ), Veterinary Services (AVS), Biological Regulatory Services (ABS), and Animal Care (AAC) programs. Each program houses their respective PG10 Category Type Code. Information needed for importation and to correctly regulate and safeguard agriculture products and related products are provided by Licenses, Permits, Certificates, and Other (LPCOs) documents.

Section I – Disclaim and HTS Flagging Guidance (PG01)

Disclaim Methodology - AQ1 (data may be required) flagged HTS Code versus AQ2 (data is required) flagged HTS Code

- IF HTS Code is flagged AQ1 then determine if LPCO’s exists.
 - If AQ1 and LPCO’s are not present, then disclaim.
- IF HTS Code is flagged AQ1 and LPCO exists, then file an APHIS Core Message Set.
 - Report all LPCO supporting documentation in a PG13/14 grouping.
- IF AQ2, then file an APHIS Core Message Set.
 - Even if LPCO’s are not required as a condition of entry.
 - Report all LPCO supporting documentation (if applicable) in a PG13/14 grouping.

Disclaim Correlation Table:

	AQ1 (data may be required) Flagged HTS	AQ2 (data is required) Flagged HTS
Regulated commodity with LPCO’s	Message Set Required	Message Set Required
Regulated commodity without LPCO’s	Message Set NOT Required (optional)	Message Set Required
Commodity <u>not</u> regulated by APHIS	Optional Message Sets	N/A

Disclaim Reporting:

Disclaim codes indicating the reason data is not being provided. Valid codes for APHIS:

A = Product is not regulated by this APHIS

- HTS Code is flagged AQ1 (data may be required)
- Importer has verified commodity is not regulated by APHIS via admissibility support.
 - Admissibility guidance and support can be found at the following web pages: (<https://www.aphis.usda.gov/aphis/banner/contactus>) or (www.aphis.usda.gov/aphis/ourfocus/importexport)
- If product is non-regulated *plant-based*
 - Report APQ as the program for disclaim or refer to the APHIS flagged Harmonized Tariff code to category type section of this appendix for additional guidance
- If product is non-regulated *animal-based*
 - Report AVS as the program for disclaim or refer to the APHIS flagged Harmonized Tariff code to category type section of this appendix for additional guidance

B = Data is not required per APHIS guidance

- HTS Code is flagged AQ1 (data may be required)
- The product is regulated by APHIS but the agency has determined the product does not need a message set or License, Permits, Certificates, or Other documents (LPCO's) as a condition of entry.
 - Admissibility guidance can be found at the following web pages: (<https://www.aphis.usda.gov/aphis/banner/contactus>) or (www.aphis.usda.gov/aphis/ourfocus/importexport)
- If product is *plant-based*
 - Report APQ as the program for disclaim or refer to the APHIS flagged Harmonized Tariff code to category type section of this appendix for additional guidance
- If product is *animal-based*
 - Report AVS as the program for disclaim or refer to the APHIS flagged Harmonized Tariff code to category type section of this appendix for additional guidance
- If product falls under USDA (Veterinary Service) Guidelines
 - Example: Most laboratory animals can be imported under USDA import guideline #1103 without a permit or certificate.
 - Report AVS as the program for disclaim or refer to the APHIS flagged Harmonized Tariff code to category type section of this appendix for additional guidance
 - USDA Guideline information can be found at the following web page: (<https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/animal-and-animal-product-import-information/import-live-animals/no-import-permit-req>)

It is important to understand not all APHIS regulated commodities require submission of a message set and not all AQ1 (data may be required) flagged Harmonized Tariff Schedule of the United States (HTSUS) codes are granular enough to know if the commodities within a given HTSUS are regulated by APHIS. In other words, some HTSUS codes are too general and have both regulated and non-regulated commodities within them.

Filers are required to submit message set for all APHIS regulated commodities where the HTSUS codes have been flagged AQ2 (data is required) or flagged AQ1 and where the commodities require LPCO's (Licenses, permits, certificates and other documents) as a condition of entry. Therefore, current APHIS policy allows filers to disclaim AQ1 commodities that do NOT require LPCO's as a condition of entry. Disclaims due to "data filed through paper" will not be allowed if filing CBP header data in ACE.

With that being said, filers may submit APHIS message sets for AQ1 flagged commodities that do not have LPCO's as a condition of entry if they believe it will facilitate the movement of the shipment. It may be beneficial to provide clearing/inspecting officers with more granular information if the commodity is

regulated and routinely inspected, even if LPCO's are not required as a condition of entry. Normally this is especially beneficial if similar commodities require LPCO's depending on country of origin or if similar commodities appear the same but regulating them is dependent on composition/ingredients, Intended use, or physical state (e.g. frozen).

Note: APHIS has an OMB (Office of Management and Budget) exemption that requires the agency to continue to receive hard copy foreign issued certificates (e.g. veterinary, health, sanitary and phytosanitary) because they are considered "legal instruments" (aka, formally executed written documents) issued by foreign governments. Even though importers/filers are submitting the certificates in paper, a message set would be required to report the other documents (e.g. permits, notice of arrivals) and to report the "presence" of the paper certificates within PG13/14 record lines.

APHIS ACE CORE Team does not provide comprehensive support for questions associated with commodity admissibility. Filers are encouraged to work directly with Importers when determining if LPCO's are required as a condition of entry. Importers (and Filers) are encouraged to utilize the long standing APHIS Import/Export infrastructure which can be contacted here: (<https://www.aphis.usda.gov/aphis/banner/contactus>)

FAQ's Section I – Disclaim and HTS Flagging

FAQ

1. When should APHIS Core be disclaimed?

- For APHIS Core, disclaims are allowed when the HTS code flag is set to AQ1 (data may be required) and Licenses, Permits, Certificates or other documents (LPCO's) are not required as a condition of entry. Note: All AQ2 (data is required) commodities require a message set even if they do not have LPCOs as a condition of entry. Optional message sets can be provided even for articles that qualify for disclaim.

FAQ

2. Under what circumstances, would an Importer disclaim a product subject to AQ1 (APHIS may be required)?

- Any circumstance that would allow the commodity to make entry without accompanying LPCO documents. Please note: Filers are opting to report message sets even if they are not required to facilitate the movement of the shipment. Using this technique allows the officer clearing the shipment electronically to quickly determine that the commodity is not something they are interested in inspecting. In essence it helps further identify the product within less specific harmonized tariff description so officers can identify it as not regulated by APHIS.

FAQ

3. Which disclaim types are allowed by APHIS Core?

- As noted in the PG01 Disclaim data element description section of the Implementation guide, disclaim code “A” (product is not regulated by this agency) and “B” (data is not required per agency guidance) are the only acceptable codes for USDA APHIS. There are no “Other Agency Means” available.

FAQ

4. How are USDA guideline statements (ex. 1100 – 1105) submitted if the commodity is eligible for disclaim? In the past, USDA will not release the shipments without submission of these documents.
- Current APHIS policy is to disclaim commodities covered by USDA guidelines using code “A” (not regulated by this agency) and then submit the guideline statement (aka manufactures statement) to DIS.
 - APHIS also accepts message sets if the importer/filer believe it will facilitate the movement of the shipment. In that case manufactures statements are reported in PG22 and sent to DIS. LPCO lines PG13/14 would not be utilized.

FAQ

5. How does an importer know if a commodity is not regulated by APHIS in order to apply disclaim code A?
- As required by regulations, importers are ultimately responsible for knowing whether a commodity is regulated by APHIS. If there are questions about APHIS import requirements, information is available at the following web pages (<https://www.aphis.usda.gov/aphis/banner/contactus>) or (www.aphis.usda.gov/aphis/ourfocus/importexport) or by calling the Customer Service Center at 1-844-820-2234
 - Note: Generally the APHIS ACE Team does not support admissibility questions.

FAQ

6. How does an importer know if permits or certificates (LPCO’s) are needed as a condition of entry?
- For questions and assistance regarding whether or not you need a permit, and regulations and policies concerning allowable imports please contact the appropriate office listed below:

- As required by regulations, importers are ultimately responsible for knowing whether a commodity is regulated by APHIS. If there are questions about APHIS import requirements, information is available at the following web pages (<https://www.aphis.usda.gov/aphis/banner/contactus>) or (www.aphis.usda.gov/aphis/ourfocus/importexport) or by calling the Customer Service Center at 1-844-820-2234
- Note: Generally the APHIS ACE Team does not support admissibility questions.

FAQ

- 7) What if the product does not have Licenses, Permits, Certificates, or Other documents (LPCO's) as a condition of entry but the HTS codes is still flagged as AQ2 (data is required)?
- If the HTS codes is flagged AQ2 (data is required) then the product is still regulated by APHIS but the agency has determined the product does not need special permission or other documents to make entry (except the message set).
 - This is generally due to the commodities country of origin and/or how it was produced or manufactured. In this case the message set is still needed to certify country of origin and all other factors that in turn allows the commodity to enter into the United States without LPCO's.

Section II – Agency Processing Codes (PG01)

APHIS utilizes this code as an agency routing code. Using this code facilitates what regulatory entity will provide clearance and/or inspection for the commodity on behalf of APHIS.

APHIS Core Program Code	Agency Processing Code (PG01 Line)	General Commodity Alignment
AVS: Veterinary Services	A01: CBP Agriculture	AP0300 (Animal Products) Commodity Category Type
	A04: APHIS VS Port Veterinarian	AP0100 (Live animals) Commodity Category Type that require VS inspection at the port of arrival
	A05: APHIS VS Animal Import Center	AP0100 (Live animals) Commodity Category Type destined to an APHIS approved quarantine facility
APQ: Plant Protection & Quarantine	A01: CBP Agriculture	AP0600 (Fruits &Vegetables), AP0800 (Cut Flowers), Commodity Category Types and AP0400 (Live plants) Commodity Category Type of Canadian Origin and/or typically low cumulative quantity of all plant material less than 13 plant units
	A02: APHIS Plant Inspection Station	AP0400 (Live Plants) Commodity Category Type (greater than or equal to 13 cumulative quantity of all plant material or are CITES, or endangered)
	A03: APHIS Pre-Clearance	Pre-cleared AP0600 (Fruits and Vegetables) Commodity Category Type, and 401 commodity category series (propagative bulbs) under AP0400 (Propagative Material) Commodity Category Type
AAC: Animal Care	A01: CBP Agriculture	118 (Canine) Commodity Category series importations of Dog’s under AP0100 (Live Animal) Commodity Category Type unless coming from a country where animal is exposed to screwworm.
	A04: APHIS VS Port Veterinarian	
ABS: Biotechnology Regulatory Services	A02: APHIS Plant Inspection Station	AP 1000 (Genetically Engineered Organisms) Commodity category type (indicated by the presence of BRS LPCOs) are processed by APHIS Plant Inspection Stations.

FAQ's Section II – Agency Processing Code

FAQ

1. Is Government Agency Processing Code required?

- No – this data is optional. It was something trade requested to help “route” shipments to the correct inspection point and/or agency.
- History Note: In the past brokers (and shippers) attached a “green sheet” (or yellow sheet) to the packet of paperwork accompanying shipments. This practice varied depending on port, but reminded the CBP (officers) not to accidentally release the shipment before “agriculture” looked at it (either CBP Agriculture or APHIS). The Government Agency Processing Code is the electronic equivalent of the “green sheet” and helps route the shipment to the proper inspecting officer.

FAQ

2. Which Government Agency Processing Code aligns with which Product Category Types [in PG10]?

- Generally A01 (CBP Agriculture) aligns with AP0200 (Related Animal Products), AP0300 (Animal Products), AP0500 (Seeds Not for Planting), AP0600 (Fruits and Vegetables), AP0700 (Misc. Processed Products), AP0800 (Cut Flowers) Commodity Category Types.
 - Exception – Canadian origin and/or small lots (less than 12 plants) of AP0400 (Propagative Material) may also align with A01 (CBP Agriculture) routing.
 - Exception – Pre-Cleared 401 Commodity Category series (Bulbs) under AP0400 (Propagative Material) and Pre-cleared AP0600 (Fruits and Vegetables)
- Generally A02 (Plant Inspection Station) aligns with AP0400 (Propagative material) and AP1000 (Genetically Engineered Organisms) Commodity Category Type.
 - Exception – Canadian origin and/or small lots (less than 12 plants) of AP0400 (Propagative Material) may align with A01 (CBP Agriculture) routing.
- Generally A03 (Pre-clearance) aligns with Pre-cleared 401 Commodity Category series (Bulbs) under AP0400 (Propagative Material) and Pre-cleared AP0600 (Fruits and Vegetables)
 - Note - Pre-clearance forms must be present.
- Generally A04 (APHIS Port veterinarian) and A05 (APHIS Animal Import Center) aligns with AP0100 Commodity Category Types.
 - Exception – 118 Commodity Category series importations of Dog’s under AP0100 Commodity Category Type will have a Government Agency Processing Code of A01 (CBP Agriculture) unless coming from a country where animal is exposed to screwworm.

Section III – Harmonized Tariff Codes and APHIS Commodity Category Types (PG10)

Commodity Categorization (overview)

The PG10 record line is the primary architecture used to help stakeholders correctly report commodities within the APHIS Message Set. This record line is critical for APHIS Message Sets because it supports the ability to filter and efficiently align commodities into specific groups. The main data element, “Commodity Category Type” is the top level grouping which allows commodities or products to be lumped and/or split into specific sub-groups using the data elements associated with Commodity Categories and Commodity Characteristics. It is important to note these categories and characteristics are directly and only align with specific related Commodity Category Types. Naming and coding conventions within the sub groups always align to the Commodity Category Type which are also aligned with APHIS Programs - Biotechnology Regulatory Services (BRS), Animal Care (AC), Plant Protection and Quarantine (PPQ) and Veterinary Services (VS) - and APHIS LPCO types, as well as, cross-referenced with the APHIS “flagged” HTS codes. Filers and their software providers can use this feature to restrict choices within the broker interface so that once an HTS and Commodity Category Type is selected only the related values within the corresponding commodity categories and characteristics, as well as APHIS Programs and LPCO’s, are available for reporting.

APHIS has flagged approximately 2,052 specific harmonized tariff schedule (HTS) codes that fall under its jurisdiction. This fluctuates slightly each year depending on the changes made by the United States International Trade Commission (USITC). Each HTS code is given a status of either AQ1 (maybe required) or AQ2 (is required) depending on how granular the HTS code describes the various individual commodity or commodities within it. Most AQ1 commodities have broad HTS code descriptions and therefore the individual commodities covered by the HTS code cannot be identified at a granular enough level for APHIS to regulate them appropriately. Occasionally APHIS regulated commodities are imported using HTS codes not flagged by APHIS. In those cases it’s important to understand importers are still responsible for meeting APHIS conditions of entry and for filing an APHIS Message Set (regardless of the tariff flagging) – especially when APHIS LPCO’s are required.

FAQ's Section III - Harmonized Tariff Codes and APHIS Commodity Category Types (PG10)

FAQ

1. What is the hierarchical structure (aka different levels) of PG10?
 - For APHIS, the top level of PG10 is the Commodity Category Type data element. Using this element APHIS has currently separated it's commodities into nine separate groups.
 - The next level down is further divided into subgroups using Commodity Categories. Each Commodity category (sub group) follows the naming/numbering convention of its parent Commodity Category Type.
 - The third level down is created by combining the values within Commodity Qualifier Codes and Commodity Characteristic Qualifiers. Each of these values continues to follow the naming/numbering convention of its parent Commodity Category.
 - For APHIS the best way to think about the third level is by understanding that Commodity Qualifier Codes are utilized to qualify which type of characteristic (e.g. Condition, Physical State, and/or composition) is being reported and then what those specific characteristics are within the Commodity Characteristic Qualifier.

FAQ

2. What level of reporting is required for PG10?
 - The first to levels of the hierarchical structure (Commodity Category Type and Commodity Category) are required for all APHIS Message Sets.
 - Note: The absence of Commodity Qualifier Codes and Commodity Characteristic Qualifiers can be an inspection trigger. If the characteristics of a commodity aren't reported then CBP Agriculture and APHIS officers are required to validate things like condition, physical state, packaging, and or composition (ingredients) as a condition of entry.

Section IV – LPCO Guidance (PG13/14)

License, Permits, Certificates, and Other (LPCO’s) as a condition of entry:

After the tragic events of September 11, 2001, much of APHIS’ PPQ workforce was consolidated into U.S. Department of Homeland Security (DHS) to unify Federal inspection forces. As a result, CBP agriculture specialists through a Memorandum of Understanding between USDA and DHS inspect shipments of imported **non-live plant and animal products** and ensure that the required LPCOs accompany each shipment. LPCOs can include permits, sanitary certificates, phytosanitary certificates, certificates of origin, and health certificates, as well as, required manufacturer statements. APHIS still continues to inspect imported live plants at Plant Inspection Stations and live animals through local port veterinarians.

By regulation, APHIS requires various LPCO’s as a condition of entry. LPCO’s provide CBP Agriculture and APHIS officers with the regulatory ability and authority to clear and/or inspect commodities. Some LPCO’s provide key information about the commodities identity (e.g. the name, amounts, conditions, origin etc.), while others provide statements of sanitary/cleanliness, or conditions of admissibility (e.g. permission, authorizations, attestments, statements etc.), while others provide arrival notification (e.g. notice of arrival, declaration of importation, etc.). Historically importers provided this information to officers “before or upon arrival” via paper [LPCO] documents. Without those documents, officers cannot release commodities into U.S. commerce. With the implementation of ACE, the prerequisite and use of these documents to clear and/or inspect commodities has not changed. The only difference is the presence (aka: existence) of these LPCO’s are now being reported in PG13/14 LPCO record lines, and depending on commodity and LPCO type the information on the paper documents are being replaced entirely by the submission of the APHIS message set.

License, Permits, Certification, and Other (LPCOs) correlation to Category Type and Program Type Code

In most cases Permits and Certificates are required for entry for APHIS regulated products. LPCOs identify the type of license, permit, certificate or other. More than one LPCO type may be used.

Category Type Code	LPCO Types (may include the following forms)	Program Type Code
AP0100 APHIS Live Animals	A02 Health Certificate A05 Treatment Certificate A25 APHIS VS 17-20 A26 APHIS VS 17-29 A27 APHIS VS 17-128 A28 APHIS VS 17-135 A29 APHIS VS 17-32 A33 Certificate of Origin	AVS

ACE / ePermits System Integration and Permit - Reporting Guidelines:

APHIS permits are used as permission or prior authorization for the importation of regulated commodities into the United States. Some import permits are one-time use only while many may be used for longer periods of time. In general, they identify who holds the permit (the applicant) and what is allowed entry (the commodity), while also providing both the importer and inspector information about specific conditions of entry.

APHIS has successfully integrated ACE with ePermits (the agencies biggest permitting system). This integration allows the agency to automatically match permit data, reported in PG13/14 record lines, with official permit records within ePermits. Upon match, the official signed permit record is displayed within the ACE Document Imaging System (DIS) allowing CBP Agriculture and APHIS officers to quickly identify permitted commodities and review their “conditions of entry”. This information is then leveraged to easily validate those conditions against what is reported within the APHIS message set and/or found during inspections.

“LPCO Type” and “Number” are key data elements for a successful match, because not all permits issued by APHIS reside within the ePermits system. When reporting permits issued by ePermits (Including: LPCO types = A09, A10, A11, A12, A13, A14, A15, A16, A17, A18, A19, A20, A21, A22, A23, A24, A28, A35, A36) an SO72 match / no match message will be sent to the filer. This message is informational only and lets the filer know whether the officer’s received the permit via the automated process, which in turn facilitates the movement of the shipment. If filers receive a “no match” message they may revise the permit number within the message set or wait to see if the officers clearing/inspecting the commodity(s) request further documentation (proof of permit).

SO72 match / no match example:

“APHIS Permit # [max 33 characters] found. Document is in DIS”

“APHIS Permit # [max 33 characters] not found. Revise #/send doc”

Foreign Issued Certificates - Reporting Guidelines:

Foreign issued certificates are usually “attestments” or “statements of fact” by a foreign government official to the cleanliness or sanitation of a specific commodity at the time of importation.

Phytosanitary certificates are used to attest that consignments meet phytosanitary import requirements and are issued by an NPPO (National Plant Protection Organization) of the foreign government. A phytosanitary certificate for export or for re-export can be issued only by a public officer who is technically qualified and duly authorized by the NPPO. APHIS accepts phytosanitary certificates that utilize the model/template designated by the Food and Agriculture Organization of the United Nations (FAO), International Plant Protection Convention (IPPC), and International Standards for Phytosanitary Measures (ISPM) 12.

Foreign inspection certificates are required to accompany all imported meat, poultry, and egg products. These certificates must indicate the product name, establishment number, country of origin, name and address of the manufacturer or distributor, quantity and weight of contents, list of ingredients, species of animals it was derived from, and identification marks. The certificate must also bear the official seal of the foreign government agency responsible for the inspection along with the signature of an agency official. This certificate must be in both English and the language of the foreign country.

Please note: APHIS has an Office of Management and Budget (OMB) exemption to continue to require some documents (like most certificates) in paper. ([See “LPCO / DIS Correlation Table” below](#))

Document Imaging System (DIS) Transmission Guidance:

DIS allows Participating Trade Partners to submit document Images and associated descriptive metadata to CBP and other Participating Government Agencies (PGA's) electronically. Upon successful transmission, the documents are securely stored and made available for review by CBP and PGAs. Documents submitted via DIS are in lieu of paper documents.

DIS presently provides the following document image submission and management capabilities:

- Allows Trade Partners to submit document images and associated descriptive metadata intended for CBP and PGAs in an automated manner
- Stores all submitted documents in a secure centralized CBP database and maintains associations with transactions such as Entries and Bills and other related descriptive data
- Allows authorized CBP and PGA users to retrieve, view, review, and annotate documents via a web based user interface
- Provides security, authorization and auditing capabilities
- Provides validation error results or receipt notification back to trade partners for each submitted document transmission
- Provides capabilities for CBP Client Representatives to view raw received messages and audit information to assist trade partners in troubleshooting.

Please note the following, regarding how CBP and PGAs can view the documents submitted to DIS by trade:

- CBP can view all documents, regardless if it's a CBP document or a PGA document
- PGAs can only view documents that are 'owned' by that agency per the Appendix A of this document, OR, if trade submits additional PGA agency codes that allows non-owning agencies to view the document. (For XML, the additional agencies are added via the GovtAgency data element. For email, they are added via AGENCY_CD).
- If a document is owned by a given agency, you do not need to also provide that agency's code in the above locations when submitting the document.

Permit for Movement or Release of Genetically Engineered Organisms (APHIS BRS 2000)	A34	APH03 (optional)	No	Yes	Yes	Yes	No

APHIS BRS Notification	A35	APH03 (optional)	No	Yes	Yes	Yes	No
APHIS BRS Acknowledgement letter	A36	APH03 (optional)	No	Yes	No	Yes	No
Commercial Invoices, Packing Lists, Corrected Commercial Invoices, and Consolidated Invoices. [Proof of Commodity Identity, Condition, Quantity, and Volume]	(PG22) 331, 380, 384, or 385	APH02	No	No	No	No	Yes

Note: “Original Paper Document Required at Arrival (as a Legal Instrument) = “*No” indicates original documentation may be needed to support information provided in DIS and/or message set during compliance exams and enforcement investigations.

A filer who transmits data or information through any electronic means to CBP certifies, by the act of transmitting such data or information, that the data or information transmitted is true and correct to the best of the filer’s knowledge and belief. The filer also declares that all statements in an electronically transmitted entry, entry summary, invoice, claim, other filing, and all other information or data filed with the entry are true and correct to the best of the filer’s knowledge and belief, and that the filer will produce at once any data or information showing that the statements are not true and correct.

- Note: CBP DIS Implementation Guide can be found here - (<https://www.cbp.gov/document/technical-documentation/ace-dis-implementation-guide#>)
- Note: CBP List of [eligible] DIS PGA Forms can be found here – (<https://www.cbp.gov/document/guidance/ace-november-1-pga-forms>)

Other documents

Other documents like commercial invoices, arrival notifications, and declarations are used to document and prove which commodities are being imported. They are also used to notify CBP Agriculture and APHIS when and where the commodities will arrive. Documentation about the commodity, as well as, when and where it will arrive is required by regulation and/or a prerequisite for the clearance and/or inspection process to start. Note: Commercial invoices and STATS are currently reported in PG22.

FAQ's Section IV – LPCO Guidance

FAQ

1. Does the need for submitting paper documents automatically mean disclaim for a message set? Reference the list of documents that require message set, upload to DIS, or submit via paper at this link. <https://www.cbp.gov/document/guidance/ace-november-1-pga-forms>
 - No – APHIS has a waiver from OMB to continue to allow foreign government issued LPCO's in paper. Those certificates are considered "legal instruments" and should continue to accompany the shipment and presented upon arrival. Even though they are required in paper, a message set would still be submitted and the "presence" of the certificate(s) would be reported in the APHIS PGA message set.
 - When the APHIS message set becomes "mandatory" (aka flags are enforced) filer using ACE to file header data will need to file APHIS message sets where appropriate. In other words if filers use ACE then they will report message sets for APHIS. Only a full paper filing would allow paper for APHIS core.
 - Note: We are working with foreign governments on a project that would have them send certificates directly to APHIS and ACE. When implemented the importer and filer would only need to report the number of the certificate within the message set. The number would then automatically match the certificate within ACE and be displayed for the officer. APHIS has implemented a similar process for our ePermits/ACE integrated system.

FAQ

2. What other scenarios exist where there is no LPCO required as a condition of entry, but a PGA message set it still required?
 - Commodities flagged as AQ2 (is required) have this condition

FAQ

3. We have a customer that imports some fresh vegetables. The two forms we get are the Certificate of Origin for Fresh Tomatoes and Certificate of Origin for Fresh Peppers. Neither of these have a document ID or control number or issuing government agency. The customer is struggling to determine if there are any other forms that need to be reported through APHIS Core or if they are message sets or disclaims.
 - For the PG13 "Issuer of the LPCO", please use the exporters company name. This is a mandatory field but isn't only used for the foreign government's name.
 - The LPCO number in PG14 is mandatory but "Certificate of Origin" or "COO" can be reported instead of a number.
 - All fruits and Vegetables are flagged as AQ2 so no disclaims are allowed even from Canada.

Section V - LAP Guidance (PG19/20)

LAP (LPCO Authorized Party) Reporting:

The LAP (LPCO Authorized Party) varies depending on LPCO type. In general this is the “issued to party” or “holder” of the LPCO. For APHIS permits the LAP is equivalent to the permittee, while certificates generally use the term “issued to party”. In some instances certificates have two parties listed, therefore the entity who conveyed (requested or paid for) the certificate should be used. This is normally the foreign party/entity present at the time the document was created and signed by the foreign government official. Unless the issued to party or holder of the LPCO is different from other LPCO’s being reported, APHIS only requires one LAP per message set regardless of the amount or type of LPCO’s required as a condition of entry listed in PG13/14. In other words, filers only need to report one LAP if the entity is the same across all LPCO’s.

Section H - Harmonized Tariff Code Master Correlation Table

0-digit HTS	10-digit HTS Description	APHIS Flag	APHIS Flag Description	APHIS Primary Category Type	APHIS Secondary Category Type	Category Code	Category Code Description	APHIS Operational Program
